News Briefs

The Eighth Annual Paul M. Aggeler Visiting Professor will be William N. Valentine, Professor and Chairman, Department of Medicine, UCLA School of Medicine. He will deliver the memorial lecture Tuesday, Oct. 25 at 11 a.m. in Carr Auditorium, SFGH Medical Center. Title will be "Hereditary Spherocytosis Revisited". On Wednesday, October 26 at 10:30 a.m., he will speak in the Medical Sciences Auditorium (Cole Hall) on "Hereditary Enzymatic Abnormalities of the Human Erythrocyte." Both events are Medical Grand Rounds. Dr. Valentine was recently named to membership in the National Academy of Sciences. He is vice president of the Inter-American Division, International Society of Hematology, and has published over 150 articles and scientific papers. The Aggeler Lecture honors the late Professor of Medicine who served as Chief of Hematology at SFGH from 1963 to 1969. Dr. Aggeler was a world authority in the field of coagulation.

Peter Ng has been named Director of the Communication Office for Research and Teaching. Mr. Ng received a master of Science in Medical Art from the Medical College of Georgia in 1961, and comes to UCSF from Cornell University where he held the position of Director of Biomedical Communications.

Monday, October 3 is the day to give blood. The Irwin Memorial Blood Bank's Donormobile will be parked in Saunders Court (quadrangle between the Nursing Building and the Health Sciences West Tower) from 8 a.m. to 4 p.m. Blood may also be given in the Main Lounge of Millberry Union from 10 a.m. to 6 p.m. The Donormobile visits the campus three times a year, and last Spring's drive netted 204 pints of blood. In addition to supplying the UCSF Blood Bank, Irwin furnished blood for over 50 Bay Area Hospitals, a demand which requires as much as 500 pints of blood per day. Every year, blood supplies dwindle during the summer months and with fall comes a time of high demand. Secure a donating appointment by calling x4015 or just stop by the two above locations.

The first annual award honoring the late Black physician and SFGH researcher John B. Harris was presented in a ceremony September 28 to E. Michael Darby for "the student graduating from UCSF who best exemplifies those qualities of John Harris that made him outstanding as a teacher, a physician, and as a person committed to human rights." Dr. Darby, a 1977 graduate, is beginning an internship in Medicine at UCSF.

Douglas Schmucker, assistant professor of Anatomy, received a three-year $150,000 award from NIH to study the "Biology of Aging." Recent studies from his lab at the VA Cell Biology Section of the UCSF Liver Center have shown several significant age-related changes in the structure of live cells, particularly a loss in the amount of intra-cellular membranes such as those involved with drug and cholesterol metabolism.

The Robert Wood Johnson Foundation has pledged 5.5 million to support a five year National Preventive Dentistry Demonstration Program. The Division of General Dentistry in the School of Dentistry will be participating in this study of 20,000 school children from 10 communities, half with fluoridated water. The Hayward Unified School District, supported by the UCSF Division of General Dentristry was of ten chosen from 111 communities across the country. Jared I. Fine, lecturer in the Division of General Dentristry has been named Dental Director of the study.

The Health Psychology program, the first of its kind in the nation, is presently training ten students in the application of psychology to relevant problems in the health care system. The faculty in this program will be pleased to receive inquiries which could lead to collaborative research projects involving Health Psychology students. In the program under the directorship of Professor George Stone, students are designing strategies for improving health care effectiveness, helping patients cope with stressful medical procedures, and improving communication between health care providers and patients. For further information call x7407.

The International Blood Cell Club held a recent symposium at UCSF on blood cell differentiation and Diamond-Blackfan anemia. Present was Louis K. Diamond, professor emeritus of pediatrics, who described the first five cases of this rare disease in the 1930's, and has treated 40 of these patients since then. The departments of Pediatrics and Laboratory Medicine co-sponsored the symposium. The proceedings will be published in the journal *Blood Cells*.

Tutorial services are once again being offered by the Health Sciences Special Services Program to any disadvantaged and/or minority student. If you are interested in receiving tutorial help or if you qualify as a tutor please contact David Godoy, Student Services Building, Upper Level, x4373.
